TECHNICAL DATA: Glue / mastic remover

Glue / mastic Remover

Glue and Mastic Remover is a non flammable water based glue and mastic remover. It effectively softens and removes most types of carpet adhesives and similar glues

Glue and Mastic Remover contains no chlorinated solvents butyl solvents or phosphates. Low VOC's

Applications

Glue and Mastic Remover - can be used on all types of floor substrates that have glue on them where water can be used as a final rinse. Glue and Mastic Remover will not interfere with the adhesion of new glues and adhesives or the use of coatings or stains

Benefits Of Glue/ mastic Remover

1. Glue and Mastic Remover is non combustible and safe for indoor use
2. Glue and Mastic Remover has no harsh or unpleasant odor
3. Glue and Mastic Remover is formulated to emulsify the glue so that after the scarping the remainder can b simply washed away
4. Glue and Mastic Remover apply material and let it penetrate for 20-45minutes or until the glue softens then scrape away glue

How to Use

Apply Glue and Mastic Remover by sprayer, mop, brush or pour on and spread with a broom thoroughly covering the area to be removed. Allow to soak for 20-45 minutes or until the glue is easily scraped up. Heavy accumulations may require a second treatment. Scrape away glue and rinse with waters

NOTE : When the floor is to be stained it is recommended that it be treated with Conclean to remove any imbedded material in the pours of the concrete
